Release 1 Plan v1

Goals:

Modify OSRA application to support polymer diagrams.

- Add support to OSRA for recognition of parentheses in chemical diagrams.
- Design Data Model for representing polymers and multi-part chemical structures

Stories:

Sprint 1:

Story Points	User Story	Priority
13	As a Developer, I need an architectural overview of OSRA's processing, so I can understand the code base.	1
20	As a Developer, I need to review each aspect of OSRA's architecture, so I can understand the code base.	2
5	As a Developer, I need to get a basic grasp of O-Chem, so I can better understand use cases.	3
5	As a Developer, I need workflow and processes for the github repo, so I can collaborate on code	4
20	As a Developer, I need a testing environment and test documentation, so I can better contribute to the codebase	5
13	As a Developer, I need to have consolidated documentation from other developers, so I can better contribute to the codebase	6
5	As a Developer, I need to understand SMILES notation and .SD file structure, so I can design the smile data structure.	7
13	As a User, I want to have a data structure for encoding polymers in "Smile Notation", so I can work with polymers	8

Sprint 2:

13	As a User, I want to have a data structure for encoding polymers in "Smile Notation", so I can work with polymers	1
20	As a User, I want to be able to detect Par. in Chemical Diagram, so I can work with polymers	2
5	As a User, I need an .SD files from the diagram for each sub molecule in the diagram, so I can work with polymers	3

Sprint 3:

20	As a User, I want to be able to detect Par. in Chemical Diagram, so I can work with polymers	1
20	As a User, I want to be able to detect Brackets in Chemical Diagrams, so I can work with polymers	2
5	As a User, I need an .SD files from the diagram for each sub molecule in the diagram, so I can work with polymers	3

Backlog:

As a User, I want to be able to detect “R-Notation”, so I can work with polymers

---

As a User, I want to be able to detect subscripts for polymer diagrams, so I can work with polymers
